

Seminar on Phytochemical analysis of invitro and invivo generated medicinal plants

30/8/2016

Organized by Department of Biotechnology

Department of Biotechnology organized a Seminar on Phytochemical analysis of invitro and invivo generated medicinal plants on 30/8/2016 by Dr. Viji M O, Assistant Professor, St. Joseph's College, Irinjalakuda. The talk emphasized on the importance of invitro and invivo conservation of medicinal plants along with the various phytochemical analytical techniques like HPLC, TLC, GC, FTIR etc. She also explained the relevance of various secondary metabolites with special reference to withaferin. A generalized idea on the importance of research in Biotechnology was also shared. It was a very lively, informative and interactive session.
